PROFESSIONAL SUMMARY

Aspiring AI Engineer with a strong full-stack foundation (MERN/MEAN, REST APIs, SQL/NoSQL) and applied experience integrating LLM features OpenAI API, LangChain, RAG into production-grade systems. Completed a software engineering internship building an AI-powered ATS and an Employee Management System, and independently designed, built, and shipped two full-stack production systems a POS platform and an e-stamp application both live and actively used in the market today. Seeking Full Stack Developer or AI Engineering roles focused on building and shipping real, production-ready products.

TECHNICAL SKILLS

Full Stack Development: MERN Stack, MEAN Stack, React, React Native (Expo), Node.js, Express.js, FastAPI, JavaScript, TypeScript, REST API Development, JWT Authentication, Web Development

AI / Machine Learning: OpenAI API, LangChain, LLM Integration, Generative AI, Retrieval-Augmented Generation (RAG)

Databases: SQL, MongoDB, PostgreSQL

Cloud, DevOps & Tools: AWS (Basics), Docker, Git, GitHub, Third-Party API Integration, UI/UX Design, Problem Solving

EXPERIENCE

Software Engineer Intern — Volka Food International Limited

Jun – Jul 2026 (6 Weeks)

- Built an AI-powered Applicant Tracking System (ATS) to screen, parse, and rank candidate resumes using LLM-based analysis (OpenAI API) and keyword/skill matching, with REST APIs (Node.js/FastAPI) and a SQL database.
- Developed a React-based dashboard for HR to review and manage shortlisted candidates.
- Developed an Employee Management System for employee records, attendance, and role-based access, with full CRUD APIs backed by a SQL database.

PROJECTS

POS (Point of Sale) Platform

Production System — Live in Market

- Built and deployed a full-stack point-of-sale platform currently used in live business operations, with focus on production-grade reliability and end-to-end ownership.

E-Stamp Application

Production System — Live in Market

- Developed and shipped a full-stack e-stamp application actively serving users in production, applying real-world full-stack engineering practices.

AI-Powered Fraud Detection & Analytics Platform

2026

- Built an ML-based web app to detect fraudulent transactions, with FastAPI REST APIs, OpenAI API + LangChain for LLM-generated insights, a React analytics dashboard, PostgreSQL storage, and Docker deployment.

EastlyAI — AI Recipe & Cooking Assistant App

Mobile App

- Built a full-stack AI recipe recommendation & cooking assistant (React Native/Expo, Node.js, Express, MongoDB, TypeScript, OpenAI API, Spoonacular API, JWT auth) with a real-time chat assistant and admin panel.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified AI Practitioner (AIF-C01)
- Generative AI on AWS Bedrock, RAG
- Full Stack Web Developer — Udemy, 2026
- Strategic Planning in the AI Age — HP LIFE, 2026
- Build Websites with WordPress — Coursera, 2026
- Building with Artificial Intelligence — Saylor Academy, 2026

EDUCATION

BS Computer Science

Air University, Islamabad | 2024 – 2028 (Expected) | CGPA: 3.02

FSc Pre-Medical

Punjab College, Multan | 2022 – 2024 | Grade: A

Matriculation

Zakria Public School, Multan | 2021 – 2022 | Grade: A
